## *OUR VISION*

Differ from traditional games, block chain games are play-to-earn, implies that players earn in-game assets and tokens which are tradable in the open market. This indicates a milestone in gaming industry and an evolutionary career mode.

The succeed in any game owing to the players' contribution. Rewarding players with game rewards and community rewards resulting the qualitative change in gaming ecology.

Our goal is to make X-metaverse the leader of this evolutionary game aspect. It is time to let more player experience a more pleasant and exciting block chain games without complication of blockchain terms.

Corresponding community is built in the very beginning to fetch feedback while we focusing on game development. We do not rush our journey to success, we intend to create a longer-term vision with great care.

# 01

# WHAT IS X-METAVVERSE ?

## Introduction

X-Metaverse is a blockchain 3D game developed with. Playable in Android, iOS and PC. All game content items and characters are based on blockchain tokens and NFT . The visual effect and gameplay of X-Metaverse are inspired by Starcraft and Star war.

Players will be immersed in the vastness of the universe, spend time to cultivate different races and upgrade space-battleships to enter more galaxies and fetch corresponding materials. The most exciting thing is that you can ally with other players to earn crypto-coin by conquest, exploration, competition, mining, production, breeding and battle.

02

# X-METaverse

The sea of danger, doubt and denial around man's little island of certainty challenges him to dare the unknown -Tagore.

In the vastness galaxies, the Milky Way, Blade Edge galaxy, Knight galaxy, and those unexplored galaxies are collectively referred to as X-Metaverse (Abbreviation: X-Meta). In X-Meta, there are different intelligent lives. They develop, expand, and invade, all trying to become the overlord of the universe. Two million years ago, the II Star war occurred in the universe and lasted nearly 100000 years. It plunged the people into misery and sadness, many lives lost and corpses everywhere. After the war, the universe entered a period of calm, and all galaxies began to recuperate and rebuild their planet. Among them, the Knight galaxy has developed particularly rapidly in recent years. The planet on the Knight galaxy is surrounded by purple light, which looks like deep purple eyes from a distance. It is mysterious and frightening. AI-shells, Alien guardian and Mankind are the three most powerful races X-Meta. They are a group of brave warriors, optimistic, brave, righteous and energetic. When the disaster strikes, the war burned again. For protecting the race, they put on thick armor again and meet unknown challenges one after another.

## 03 *GAME & GAMEPLAY*

# About the pilot races

Which side you choose to be as an interstellar pilot? Alien Guardian, AI-shells or mankind. Different races possess different attribute bonuses. Comprehensive skills lead to more strategic and interesting battle, and prosperity your terrain during conquering the galaxies.

# PILOT RACE

## Alien Guardian

---

Alien guardian is a pure life with material existence as the core. It has no distractions, no irrational and random behavior of Mankind, the only goal of it is to survive. They live on delta energy must be synthesized from VA matter in the atmosphere.

Alien guardian lives mostly on the eternal planets of the Knight Galaxy. Alien guardian which is the original race of Knight galaxy and the oldest race in the galaxy. They thrive with different races in the Knight galaxy, so they have the most different appearance forms, some with wings behind, sharp corners on their heads, and some with giant hands. Their strength is collecting information. The mission of their race is to guard the Knight galaxy. The elders of Alien Guardian are responsible for documenting the galaxy's history, development, changes and some unknown secrets of the galaxy.

# PILOT RACE

## Mankind

Descendant of Mankind prisoners who fled here millions of years ago. They have a especially highly intelligent, who can create the highest performance space-battleship. Mankind live on oxygen and water.

3.5 million years ago, mankind and Al-shells fled to the Knight galaxy. Al-shells occupied Kara planet in the Knight galaxy. And mankind have found a future planet suitable for them. In the future planet, there have mountains and water, and the temperature remains at 25 °C all year round. It is the most suitable planet for mankind habitation in the Knight galaxy. They set up a base on the future planet. Lisa is their leader now, who has an important family mission: return to the megalithic planet of the galaxy and regain the leadership, wash away the reputation of their defectors.

# PILOT RACE

## Al-shells

Al-shells is the most powerful race in X-Meta. They live on matrix energy, which they need to be supplemented every 48 hours.

3.5 million years ago, Al-shells was originally developed by a team of top biologists from the galaxy's most powerful planet, the megalithic planet. They are high-level combat robots with powerful fighting power and destruction. Their mission is to help Carl, the leader of the planet, dominate the galaxy. After the fighting force suddenly lost control in the megalithic planet, no one knows what happened while Al-shells fled megalithic planet with a group of mankind in the space-battleship , finally arrived at the Kara and set up their first base on the planet of the Knight galaxy .

# SPACE-BATTLESHIPS

Particle Canon

Laser Weapons

Omega Frost

Electromagnetic Trail Canon

Upgrade your space-battleship, explore and conquer more planets and defeat them (PVE) to level up and improve space-battleship attributes. space-battleship of higher levels can defeat stronger enemies and earn more.

Fetch resources during the voyage to upgrade space-battleship technology in interstellar institute, pilot space space-battleship to conquer galaxies.

# SPACE-BATTLESHIP TYPES

## Cruiser

It is a pure and simple beast of steel, and most eye-catching on the entire battlefield. Any enemy targeted by the Cruiser can only be destroyed.

## Frigate

It was built after many design adjustments. It has heavy armor and can draw enemies' gunfire from the fleet during the attack. It is the most annoying opponent on the battlefield.

# SPACE-BATTLESHIP TYPES

## Destroyer

Being the main battleship in large-scale operations. It has a variety of attack capabilities with excellent armor and speed. The destroyer is the highest in overall performance.

## Bomber

Capable to launch nuclear strikes on the enemy bases and troops at the beginning of the battle. The battle is about to end when the Bomber succeed.

## Interceptor

The enemy on the battlefield is nowhere to hide with the existence of Interceptor. The strong reconnaissance capabilities and extreme mobility allowing it to reach anywhere on the battlefield at any time.

# ABOUT SPACE-BATTLESHIP PARTS

## ARMOR

Affects the armor of the space-battleship. When the armor value becomes 0, the space-battleship unable to fight.

## TURRET

Affects the attack skills of space-battleships. Provides additional damage.

## THRUSTER

Affects the actions order of space-battleships. The higher the value, the faster the speed.

## NUCLEAR POWER

Affects the critical strike rate of space-battleship. The higher the critical strike rate, the higher chance to cast critical strike.

## SPACE-BATTLESHIP DEVELOPMENT

After spending two space-battleships and certain research fee, players will get a space-battleship blueprint, which can be traded in open market or upgraded by yourself. The new space-battleship will inherit partial skills from consumed space-battleships

# PVE

\*In-game screenshot

Command your space-battleship with the pilot to upgrade via battles, explore and conquer different planets and fight with them (PVE). More advanced fleets can defeat stronger enemies and earn more.

More space resources can be acquired in the interstellar research institute after exploring the galaxy. Enhance the all aspect of capabilities of your space-battleship and assist the Galaxy Babes in the battles.

# PVP

Chase higher rank in Force Mine tournament(PVP) and update the ranking in real time. The higher rank, the more rewards.

Alliance battle for planets is coming soon. Join an alliance to attack and conquer planets.

# BATTLE & STRATEGY

## Tactic formation

X-Metaverse is a strategy card game. Players first need to obtain pilot and space-battleship. One space-battleship needs one pilot and battles based on preset tactic formation.

\*In-game screenshot

## Card battle

Use cards release the space-battleship skills in games. When the pilot onboard, the space-battleship has a correspondingly unique buff for skills.

\*In-game screenshot

## Pilot skills

In the game, a skill will be provided for the pilots on the space-battleship where they are. Using the pilot skill when appropriate will surprise the enemy.

\*In-game screenshot

## Turn-based strategy

A variety of combat strategies can be formulated through the combination of different space-battleship skills, pilot skills, and support skills. Come and fight!

\*In-game screenshot

# HOW TO PLAY

Interstellar Exploration  
(PVE puzzle quest)

Planet NFT  
(Purchase NFT planets in the market, show off rare items here, etc. Planet NFT holders can also participate in special events)

Space Jump  
(space-battleship racing)

Alliance War  
(Battles for planet between alliances)

Loan  
(Lease and rent space-battleship to create income, a certain percentage of all income will be automatically charged)

Interstellar Visit  
(Visit players' NFT planets)

MiningTown  
(Decentralized quantitative trading)

Battles for Force  
(PVP Leaderboard)

# CONTENTS

**04** *MARKET*

# MARKET

Commodities can be freely sold in the trading market. Include: space-battleships, blueprints, game items, planets, energy cores, resources, etc.

All purchases and fees will be burned 4.75%. X-Metaverse will naturally experience deflation with the ecosystem continues to develop.

# NFT

Open the Blind box and let the pilot lead you to experience the charm of space voyage.

## **Box**

Every box contains one NFT interstellar pilot. Thereby, an NFT can be generated and minted on the BNB Smart Chain

## **SPACE-BATTLESHIP AND BLUEPRINTS**

Players are able to purchase and sell NFT space-battleships as well as NFT space-battleships blueprints in the market. It takes only 5 days to build a space-battleship from blueprints.

## **PLANETS**

The planet purchased in the trading market is an independent NFT planet, which produces resources at regular intervals. Users can visit each other to interact.

# PLAY TO EARN

- Battle through exploration
- Daily mission reward
- Mint and sell NFT
- Mint, smelt and sell ores and materials
- Research and develop space-battleship for sale
- Loan Scheme
- Refer friends to earn rewards
- Purchase NFT planet
- Token staking rewards
- Force combat leaderboard
- Space jump
- Mining town
- War between alliances

# DISTRIBUTION

The Treasury can be viewed here:

<https://bscscan.com/address/0xB080171C8999C336cC115d4d8224C2dE51657A1c#code>

X100

All four core mechanisms of X-Metaverse need Token: reproduction, and Token will be burned when used in these mechanisms. The great demand of Token makes Token a valuable token.

Chase higher rank in Force Mine tournament(PVP) and the ranking will update in real time. Winners can get Token rewards after game over. The higher rank, the more rewards.

Participate in interstellar alliance battles, fight with allies, defeat the enemy and occupy the public planet to obtain Token.

Purchase planet NFT, send a pilot to station that it can generate mining rewards on a regular basis.

We will apply new gaming mechanics on planets so players can obtain more benefits, driving more demand for space-battleships.

Mining planet itself will consume resource, which will create new ETH in the ecosystem. Players will have more rights of specific space in the game despite income is uncertain.

Making powerful tools may drive a large demand of space-battleship from hardcore PVP players who are mainly motivated by competition. As they may release space-battleships to make items that can enhance others space-battleship. This will create a new space-battleship.

# 05

*DEVELOPMENT & PLANNING*

# DEVELOPMENT&PLANNING

Increase demand for space-battleships:  
Price rise > Ships building capacity rises > Token/ Ships building demand rises > Token price rises

X-Metaverse is closely connected with the game ecosystem, and its value will be directly related to the success of the project. Token is deflationary. Players/investors will be encouraged to hold and lead to natural and healthy price growth. This will be achieved in the following ways: Token will be required as the main form of in-game currency. Players need Token to pay for reproduction fees, advanced fees, purchase items, etc. In addition, all purchase and payment expenses will be burned by 4.75%. With the development of the ecosystem, XMETA will deflation naturally.

The non-transferable and competitive space-battleship in the arena changes the game rules, allowing players to focus on playing and enjoy the game without investing lots of money in advance and promoting them to invest in the core PvP game loop. They are more likely to invest to compete with others and gain control rather than make money .

**Collectibles:** Like many other types of games, collecting different space-battleships is fun and exciting. There are definitely rare collectibles which are very expensive and hard to acquired. We construct the gameplay, in which you have clear goals and instructions on which space-battleships should be collected. You can show the unique and rare X-Metaverse NFT you have collected to others and unlock various in-game benefits. This type of gameplay is motivating and exciting for collectors and gamers.

# ECONOMIC CYCLE FORECAST OF X-METaverse

The economic leverage of X-Metaverse will influence each other in different ways at different stages. They are X-Metaverse's NFT, Token (core, main token). These assets balance each other at different points.

## Stage 1. Starting point and end point

Lower price in Token  
Lowest rate of return

## Stage 2. Growth Period

Low rate of return  
Higher price in Token  
Battle income < space-battleship sale income

## Stage 3. Bloom

Higher price in Token  
High rate of return  
Battle income > space-battleship sale income

## Stage 4. Recession

Lower price in Token  
Highest rate of return  
Battle income > space-battleship sale income

# ECONOMIC CYCLE FORECAST OF X-METAVERSE

1

## Stage 1 → Stage2

The beginning of game, lesser consumer players, lower asset price. Initial rise of asset price will be attributed to players purchase Token and NFT to start the game.

2

## Stage 2 → Stage3

Players began to compete and purchase more Token and NFT for fierce competition. This will increase the demand of underlying assets.

3

## Stage 3 → Stage 4

The requirements for players will be higher because players need spend large amount of capital on R&D of space-battleships. Then NFT will reach new high price, while the price of the new supply of NFT will increase correspondingly.

4

## Stage 4 → Stage 1

Since the rate of return keep reducing, players with only business purpose may quit. As a result, the price returns to a rational level and allows new players to get a better chance to start the game and enjoy better game experience.

03

## Co-founder

### CEO

Kane Lao has nearly 15 years of experience in the game industry. Kane previously worked as a producer in a successful Hong Kong gaming company.

During his tenure in the game industry, Kane launched nearly 10 games in his listing strategy, including mobile games, and web games.

Before entering the game field, Kane achieved his brilliant career in the financial field. Nowadays, the fusion of gaming, finance, and blockchain has a breakthrough, enhancing the rapid development of LCBC Games.

### CTO

Vanny Ng has been a senior technical engineer working in the game industry for 18 years and has been deeply involved in the technical field.

Vanny entered the blockchain industry in 2015 and gradually turned to digital asset research and technical consulting services.

Vanny has a strong Linux, System Administration and DevOps skills and managed cloud-based and bare-metal co-located linux environments throughout his career. He's expert in Javascript/NodeJS and Ruby and very proficient in other programming languages such as Python, Golang and GO.
